Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field F is a rectangular array of scalars each of which is a member of F . Most of this article focuses on real and complex matrices, that is, matrices whose elements are real numbers or complex numbers ...

The history of mathematical notation includes the commencement, progress, and cultural diffusion of mathematical symbols and the conflict of the methods of notation confronted in a notation's move to popularity or inconspicuousness. Mathematical notation comprises the symbols used to write mathematical equations and formulas. Notation generally implies a set of well-defined representations of ...

Thales of Miletus, engineer (c. 624-546 BC) First sage of Greece, he founded classical geometry and natural philosophy. Alchemists have claimed him as one of their own. The theorem of Thales (one of two) is about two triangles with parallel sides: The pyramid's shadow is to the pyramid what a man's shadow is to the man []. ...
