The implications of such a discovery will radically change our conception of what it means to be a conscious being, and will have radical effects on neuroscience, metaphysics, judicial law — and psychology. Do you believe the mind is identical to the brain. If your answer is no, you are a closet dualist. You believe that brain and mind are made of different kinds of stuff. Such a stance will make it hard for you to understand the nature of consciousness. It will make the mental aspects of our lives mysterious and unknowable.
