Amphibians of Ohio . Amphibians of Ohio represents the most comprehensive treatment to date of the state's 40 species of frogs, toads, and salamanders; covering all aspects of natural history, taxonomy, systematics, conservation, sampling techniques, and more. The Ohio Biological Survey, in cooperation with the ODNR Division of Wildlife, is pleased to offer this approximately 900 page ... Chimaeras live in temperate ocean floors down to 2,600 m (8,500 ft) deep, with few occurring at depths shallower than 200 m (660 ft). Exceptions include the members of the genus *Callorhynchus*, the rabbit fish and the spotted ratfish, which locally or periodically can be found at relatively shallow depths. Consequently, these are also among the few species from the Chimaera order kept in public ...
