

Download Finishing And Packing Manual

2 Chapter 15 – Inspection, Labeling, and Packaging Objectives The final phases of drug product manufacturing consist of a physical inspection of the primary product container and the liquid or lyophilized drug product within the container. This is followed by labeling and packaging the product for shipment. The inspection may be manual, mistake. Mixing up buyer manual instruction is common at packing section. Finishing guy should check all packing details with the merchandiser to clear their concept to avoid wrong packaging before insert into production line such as packing material details, size breakdown, barcode sticker position, label position etc. PAINT BOOTHS & FINISHING EQUIPMENT from Global Finishing Solutions Browse Products Leading the Industry in paint booth and finishing System Technology Headquartered in Osseo, Wisconsin About Products Experience Support About GFS A vertical manufacturer, Global Finishing Solutions® (GFS) has an extensive history of designing and building exceptional paint booths and finishing equipment that ... Inexpensive Ergonomic Tilt Packing Stations eliminate awkward lifting and provide ergonomic comfort, as well as, providing a way to stabilize product that tends to fall over in the box while packing, i.e. tubes of chalking, etc. Conveyor top can be oriented to allow exit of the box from the rear of the packing station or from the side.
