

Download Honda Genuine Manual Transmission Fluid Viscosity

AMSOIL Manual Synchronesh Transmission Fluid 5W-30. Designed for manual transmissions and transaxles with synchronesh systems that require light viscosity, non-extreme-pressure fortified oil. Additive technology provides proper friction characteristics for smooth shifting. The ultimate in gear and bearing protection & outperforms motor oils in manual transmissions. Engines, like people, need to breathe clean air to stay fit. Without a free flow of clean air, an engine can't perform at its best. It's the job of your engine's air filter to remove dust and contaminants from incoming air before they can reduce performance, increase fuel consumption and cause premature engine wear. Proper and timely vehicle maintenance is important to help promote a long vehicle life. Honda engineers have conducted exhaustive performance tests to create specialized oils and fluids along with specific maintenance service intervals that help support the performance and longevity of your Honda vehicle. Actually, this oil WILL NOT void your warranty for the tranny. The Nissan Service manual states the manual tranny must use Genuine NISSAN Manual Transmission Fluid (MTF) HQ Multi 75W-85 OR an API GL-4 Viscosity SAE 75W-85 equivalent.
