

Download Palliative Care Nursing Quality Care To The End Of Life Third Edition

Palliative care is an interdisciplinary approach to specialized medical and nursing care for people with life-limiting illnesses. It focuses on providing relief from the symptoms, pain, physical stress, and mental stress at any stage of illness. The goal is to improve quality of life for both the person and their family. Evidence as of 2016 supports palliative care's efficacy in the improvement ... Palliative wound care is an alternative approach that focuses on relieving suffering and improving the patient's quality of life when their wound no longer responds to, or the patient can no longer tolerate, curative treatment. Where typical wound treatment primarily focuses on bringing a wound to closure, palliative care focuses on symptom management, addressing the problems of infection ... Death, dying, and end-of-life care and decision-making Practical insights into the end of life The goal of palliative care is to improve the quality of life of patients with an active, progressive disease that has little or no prospect of a cure.
