The Case of Daniel Paul Schreber: Paranoid Schizophrenia documents the rise and fall of Daniel Schreber, from his appointing to the Supreme Court of judges to his long-term commitment to the psychiatric unit. Daniel Paul Schreber, born in 1842, was a German magistrate. He also had severe and chronic schizophrenia and wrote books about his struggles with his illness. His father was a doctor and author, who wrote on the topics of child-rearing, public health, and exercise, and it’s been theorized that Schreber’s mental health issues were the result of his father’s unusual perspective on parenting.
