Air conditioner user manuals, operating guides & specifications.I have a building that has some Water source heat pumps with the Trane TUC controllers. The TUCs are configured for WSHP. They are point type 39 on the Tracer 100. At this job they have a 2 wire remote zone sensor going into the board. The Tracer decides the setpoints internally in the board. Well on the wiring diagram it shows a Zone Sensor Module that has a cool and heat setpoint option.
